

Louis Whitmore Jr.

Junior Game Designer | Unity Developer

lwhty92@outlook.com • (443) 684-4268 • Florida, USA • litch.io • [Portfolio Site](#)

Game designer and Unity developer focused on gameplay systems, combat design, enemy and boss design, level design, and technical game development. Founder and Lead Game Designer of TroubleCub Games, where I designed and shipped a publicly playable prototype of *Two Little Wounds* and am currently leading its redesign. Experienced in translating game concepts into structured design documentation, prototyping gameplay systems, evaluating player experience, and planning development milestones. B.S. in Web & Digital Design with a Computer Science minor, expected December 2026.

Game Design & Technical Skills

- | | | |
|--------------------|--------------------------|--|
| • Gameplay Systems | • Unity Engine (2D & 3D) | • Game Design Documents (GDDs) |
| • Combat Design | • C# | • Worldbuilding Documentation |
| • Level Design | • Git | • Game Research & Competitive Analysis |
| • Playtesting & QA | • Blender & 3D Tools | • Agile Development |

Projects

TroubleCub Games, Remote

2022, Dec 2025 – Present

Founder & Lead Game Designer

- Designed and shipped a publicly playable prototype in approximately three weeks as a self-imposed solo game jam project.
- Created two playable characters, the Soldier and Stalker; each with distinct attack sets and gameplay roles.
- Designed four playable levels featuring dynamic enemy spawning and a multi-phase boss encounter with normal and enraged states.
- Led the redesign of *Two Little Wounds*, a 3D action dungeon-crawler, defining gameplay systems, combat direction, camera design, and multiplayer scope.
- Benchmarked combat, level design and pacing against five action titles (The Lord of the Rings, Diablo IV, Hades, Gauntlet: Dark Legacy and Enter the Gungeon) to inform design and pacing decisions.
- Authored a World Bible covering factions, characters, regions, bestiary, timeline, and power systems to establish consistent long-term design direction.

Additional Game Projects (Unity)

- Asteroid Evade — mobile arcade (2024): single-button dodge mechanic, escalating barrage, 3-strike fail state
- NaviGuntion: Car Royale — PC combat arena (2024): power-up missiles, AI ramming, last car standing
- VR Explorer: Submerged — VR education (2024): diver-perspective level, species ID, conservation-themed UI

Professional Experience

Aspira, Remote

Jul 2024 – Present

Technical Support Specialist

- Troubleshoot software, hardware, and network issues for clients; translate technical concepts across varying levels of technical literacy
- Document issue resolution and maintain workflow compliance across ticketing systems while consistently meeting service-level KPIs

Rebecca Everlene Trust Company, Remote

May 2023 – Jul 2023

Design Intern

- Researched Mapbox SDK integration feasibility for a GPS-driven mobile application while collaborating as part of a cross-functional design and development team to evaluate technical implementation considerations.

Education

B.S. Web & Digital Design, Minor: Computer Science (Expected December 2026)

University of Maryland Global Campus

Undergraduate Certificate — Augmented & Virtual Reality Design — 2024

University of Maryland Global Campus

Professional Certificate — Google Project Management — 2026

Google / Coursera
