

# Louis Whitmore Jr.

Game UI Designer | UI/UX Designer | Front-End Developer

Lwhity92@outlook.com • (443) 684-4268 • Florida, USA • [Itch.io](#) • [Portfolio Site](#)

UI/UX designer and front-end developer who takes projects from research and wireframes through to hand-coded, accessible HTML/CSS/JS. Prioritizing clean visual hierarchy and intuitive built interfaces for a variety of projects, including web applications and in-game HUD for video game software. Completing a B.S. in Web & Digital Design at UMGC in December 2026.

## Design & Technical Skills

- |                             |                            |                        |
|-----------------------------|----------------------------|------------------------|
| • Figma & Prototyping       | • Wireframing & Mockups    | • Design Systems       |
| • User Research & Personas  | • Information Architecture | • Accessibility (WCAG) |
| • HTML5 / CSS3 / JavaScript | • SCSS Preprocessing       | • Responsive Design    |
| • Adobe Creative Cloud      | • Game HUD & Menu Design   | • Unity UI             |

## Projects

### Independent Projects *(Personal, Unity)*

- Two Little Wounds — Founder, TroubleCub Games (2022): designed the complete UI system for the first prototype including player health icon, boss health bars, character selection screen, and in-narrative dialogue boxes
- Exiled (2022): designed the pause menu and an in-game tutorial interface for this early action prototype
- The Conjuror's Collusion (2020): UI layout for "storybook" choose-your-own adventure game (choose-your-own adventure game) with custom fonts and page-based framing to simulate the appearance of a book on screen.

### Portfolio Project — CMST 385, UMGC

2026

*UI/UX Designer & Front-End Developer*

- Designed and developed an 11-page professional portfolio through a complete UX lifecycle — three audience personas, Figma wireframes, full design system with color tokens and type scale, high-fidelity mockups, and coded implementation
- Built responsive design at two breakpoints with accessible semantic HTML5, custom CSS architecture using CSS custom properties, and vanilla JavaScript including form validation, content tabs, and click-based dropdown navigation
- Achieved WCAG-compliant color contrast, ARIA labels, tabindex navigation, and semantic landmarks throughout all 11 pages

### Additional Web Design Projects *(UMGC coursework)*

- CMST 385 (2026): responsive site implementing SCSS variables, mixins, nesting, and media queries.
- CMST 384 (2026): multi-page software developer studio site covering projects and services, built with semantic HTML5 and CSS
- CMST 308 (2024): Designed an end-to-end UX case study for ineedhelp, a mental health support app concept — user personas, hierarchical task analysis, wireframes, high-fidelity mockups, and a storyboarded AI-to-human-counselor escalation flow, backed by defined usability metrics (task completion rate, retention rate)

## Professional Experience

### Aspira, Remote

Jul 2024 – Present

*Technical Support Specialist*

- Provide technical support and documentation while resolving software issues and maintaining client interaction records to optimize resolution workflows

## Education

### B.S. Web & Digital Design, Minor: Computer Science *(Expected)*

December 2026

*University of Maryland Global Campus*

### Undergraduate Certificate — AR & VR Design

2024

*University of Maryland Global Campus*

### Professional Certificate — Google Project Management

2026

*Google / Coursera*
